

Bloodborne Pathogens: Spanish Course

Estimated Time to Complete: 15 minutes

Course Description

SafeSchools Transmitidos Pategenos por le Sangre course is for native Spanish speakers. The course introduces the type, statistics and scope of the disease; guidelines for the clean up and handling of potentially infectious wastes or contaminated materials; the risks associated with workers exposed to BBPs (including vaccination and reporting information); and delivers training designed to emphasize the practices of proper exposure control. The course contains specific references to OSHA regulation 29 CFR 1910.1030.

Common Themes

- Disease identification, symptoms and vaccination options
- Examples of correct and incorrect exposure control
- Universal Precautions
- Personal Protective Equipment (PPE)
- Bloodborne Pathogens incident clean up and disposal guidelines
- Incident reporting

Authors

James Vaughan is President of Today's Resources, Inc. (TRI); a full-service safety and health consulting firm. Jim has direct OSHA compliance and loss-control experience. Karl Sommers III, a TRI associate, experience as a safety director in a manufacturing environment and leadership duties within area professional safety organizations.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. CD-ROM versions of the course are also available.
