

Online Safety: Cyberbullying

Estimated Time to Complete: 15 minutes

Course Description

SafeSchools Online Safety: Cyberbullying course is a 15-minute approach to cover the ways in which students exploit technology in order to harm others. The course begins with an overview of the many ways kids communicate online. The instruction centers on the three criteria of bullying, legal limitations faced by schools and how to handle a cyberbullying situation.

Common Themes

- Students access the Internet through a much wider means than most school employees realize.
- Cyberbullying is increasingly commonplace and has all the devastating effects of bullying.
- Legal strategies and recommended acceptable use policies to help districts protect themselves
- Schools need to balance free speech protections while ensuring the online safety of students and staff.

Author

Steve Holland is the founder and president of Holland & Associates, a Georgia-based consulting firm that provides safety & communications services to schools and business nationally. Steve is a former information executive and consultant with notable organizations such as The Thomson Corporation, Scenario Learning, and CNN. While at CNN, Steve was instrumental in the launch of CNNfyi.com, one of the nation's first Internet-base forums for teens.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses.
