

General Safety Orientation

Estimated time to complete: 20 minutes

Course Description

SafeSchools General Safety Orientation course is a concise overview of workplace safety concepts and issues designed primarily for new school employees. The course explains the importance of key workplace safety topics such as safety committees, fall protection, protective equipment, confined space, hazard communications, bloodborne pathogens, and much more. It's an excellent way to lay a foundation of safety appreciation and awareness by making sure that your new hires are well-grounded in key safety concepts.

Common Themes

- Spans important workplace safety topics
- Stresses cross-functional safety committees as vital to the district
- Underscores the importance of safety rules and accident reporting

Authors

Steve Lyons is a Loss Control Consultant for the Puget Sound Workers' Compensation Trust. The Trust is a cooperative pool of self-insured school districts for workers' compensation insurance coverage. Steve has over six years of direct OSHA/WISHA compliance and loss control experience and holds an Associate in Risk Management degree from the Insurance Institute of America.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
