

Health Emergencies Overview

Estimated time to complete: 25 minutes

Course Description

SafeSchools Health Emergencies Overview course is a tutorial designed for all school staff that focuses on the four major chronic conditions prevalent among students. The course provides a brief overview of asthma, diabetes, life-threatening allergies, and seizures.

Common Themes

- Statistics on increasing prevalence of chronic conditions among students
- Definitions of these chronic conditions
- Signs and symptoms of the major chronic health conditions
- Important health care considerations in minimizing health emergency risks

Authors

Suzan Tibbitts is a school nurse in Utah. She is directly responsible for the health care of over 9,000 students, and project manager of the Vaccine for Children program in the Granite School District. Suzan graduated from Westminster College with a Bachelors degree in Nursing and received her Masters of Nursing in Health Care Administration and Education from the University of Phoenix.

Janell Eastman is also a district nurse with responsibility for over 9,000 students in the Granite School District of Utah. Her past experience includes Surgical Nursing, Public Health Case Management and Occupational Health Administration. Janell graduated from Brigham Young University with a Bachelors degree in Consumer Economics and from Westminster College with a Bachelors degree in Nursing and received her Masters of Education from Cambridge College.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
