

Ladder Safety (Spanish)

Estimated time to complete: 20 minutes

Course Description

SafeSchools *Ladder Safety Spanish* course is designed to help native-Spanish speaking review one of the top work-loss issues in school districts: falls from a height due to inappropriate use of equipment (tables or chairs in place of a ladder). The course demonstrates the importance of using the proper equipment to work safely above the floor and provides specific references to OSHA's CFR 1910.25, .26, .27, .118 and 1926.1053.

Common Themes

- Safe work practices to encourage the use of proper equipment
- Examples of correct and incorrect ladder use
- Definition of ladder types and the ladder rating system
- Ladder inspection techniques and user responsibilities
- Ladder tagout requirements and maintenance procedures
- Annual inspection and reporting requirements

Authors

James Vaughan is president of Today's Resources, Inc. (TRI), a full-service safety and health consulting firm. Jim has direct OSHA compliance and loss-control experience. Karl Sommers III, a TRI associate, has experience as a safety director in a manufacturing environment and leadership duties within professional safety organizations.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The SafeSchools approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
