

Playground Maintenance & Inspection

Estimated Completion Time: 20 minutes

Course Description

SafeSchools Playground Maintenance & Inspection course gives an overview of the fundamentals of preventing playground hazards. The course illustrates the most common hazards, as well as nationally-recognized standards for playground equipment. The course details important fall-surfacing criteria to minimize playground injury as well as proper use zones for playground equipment. Inspection checklists are also covered.

Common Themes

- Reviews the high costs of playground injuries
- Shares relevant statistics about the playground injuries & maintenance
- Covers the most common playground hazards for maintenance staff
- Details fall surface criteria and use zones for various apparatus
- Covers playground maintenance inspection checklists

Author/Reviewer

The National Program for Playground Safety is a non-profit organization committed to improving the safety of playgrounds for children. Widely recognized as the leading experts on playground safety, NPPS routinely provides training, safety assessment, certification, and other consulting services for school districts and municipalities across North America.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
