

Slips, Trips and Falls for Teachers and Administrative Staff

Estimated Time to Complete: 20 minutes

Course Description

SafeSchools *Slips, Trips and Falls for Teachers and Administrative Staff* course is designed to provide basic information to help teachers and administrative staff reduce slip, trip and fall hazards in classrooms, hallways, offices, libraries and more - really, *everywhere* throughout the school's campus. The course reviews techniques to apply proper safe guards when working in slippery areas and develop effective organizational habits to reduce the potential for trips, as well as provides recommended practices to reduce the possibility of a fall.

Common Themes

- Development of a safe workplace attitude
- Best practices for working with fluid covered surfaces
- Review of organizational practices to avoid accidents
- Examples of correct and incorrect STF practices
- District responsibility for the prevention STFs

Authors

James Vaughan is president of Today's Resources, Inc. (TRI), a full-service safety and health consulting firm. Jim has direct OSHA compliance and loss-control experience. Karl Sommers III, a TRI associate, has experience as a safety director in a manufacturing environment and leadership duties within professional safety organizations.

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while a Compliance Management System automatically tracks his/her progress through the courses. This assists the district administrator or training coordinator in demonstrating compliance.
