

Bloodborne Pathogens: Refresher Course

Estimated time to complete: 15 minutes

Course Description

SafeSchools Bloodborne Pathogens: Refresher course is designed to help school employees meet their annual BBP training requirement. This refresher course is ideal for employees needing a brief review of basic concepts.

Core Course Elements

- Disease identification, symptoms and vaccination options
- Correct exposure control procedures
- Universal precautions
- Personal Protective Equipment (PPEs)
- BBP incident cleanup and disposal guidelines
- Incident reporting
- Three incident examples including correct responses
- End-of-course quiz

Authors

James Vaughan is President of Today's Resources, Inc. (TRI), a full-service safety and health consulting firm. Jim has direct OSHA compliance and loss control experience. Karl Sommers III, a TRI associate, provided experience as a safety director in a manufacturing environment and leadership duties within professional safety organizations.

Instructor Support Materials

SafeSchools courses come complete with instructor materials to augment and support the training. Included with the course are:

- Microsoft PowerPoint presentations
- Course assessments (quiz questions and answers)
- Library of reference materials
- Links to Web sites providing helpful support information
- Printable "Certificate of Completion" for course-takers

Training Environments

SafeSchools is ideal for a blended learning environment, complementing in-service or video training, or as a stand-alone training course. The *SafeSchools* approach engages the learner in an e-learning environment; while the Compliance Management System automatically tracks his/her progress through the course. This assists the district administrator or training coordinator in demonstrating compliance.
