K-12 Administrators Select SafeSchools Online Staff Training System as a Top 100 Product for 5th Year

District Administration magazine readers vote training solution best in market

Cincinnati, Ohio (Dec. 1, 2014) – For the fifth consecutive year, [SafeSchools Training](#), the leading online staff training system for K-12 schools, has been named a District Administration Magazine Readers’ Choice Top 100 Product. Created by [Scenario Learning, LLC](#), the SafeSchools Online Training System is a 100 percent school-focused system that delivers expert-authored courses on a variety of important school safety topics to every district and school staff member.

Identified by District Administration’s editors from a record 2,400-plus nominations, the winners received the highest number of nominations and best descriptions from K-12 education leaders. The Readers’ Choice Top 100 Products program informs superintendents and other senior district leaders about products their colleagues around the country are using to help their districts excel in a variety of areas, such as technology, sustainability and curriculum instruction.

“We’re honored to be named one of the best programs in the education industry, especially since the nominations came from our customers, who are using SafeSchools Training to make their schools and districts even safer and more compliant,” said Brian Taylor, CEO at Scenario Learning.

To help districts become more efficient and maximize already tight budget dollars, the SafeSchools Online Training System allows districts to move entire staff training plans online, saving both time and money. Using the program, administrators can train more staff, in less time, for less money, while making their districts safer places to work and learn.

“With the Top 100 award program steadily growing in size and recognition each year, all of our 2014 honorees should be very proud of their success,” said JD Solomon, District Administration’s editorial director. “We hope that all of our readers continue to be inspired and find innovative ideas from their peers who have had successful product implementations.”
